

TAHIR MAHMOOD

Artificial Intelligence Student and Machine Learning, Computer Vision, and Internet of Things Practitioner

Sukkur, Sindh, Pakistan • 0319 2429525 • f23ari50@aror.edu.pk

Portfolio: tahirmd.vercel.app • LinkedIn: linkedin.com/in/tahirmahmood 781b93329 • GitHub: github.com/Tahir MD

SUMMARY

Final year Bachelor of Science student in Artificial Intelligence at Aror University of Art, Architecture, Design and Heritage, Sukkur, with a Grade Point Average of 3.43 out of 4.0 and an expected graduation of May 2027. I build intelligent systems across Machine Learning, Natural Language Processing, Computer Vision, and Internet of Things, taking projects from data preparation through to deployment. I am currently completing several internships at once in generative Artificial Intelligence, machine learning, computer vision, embedded systems, and content ranking, while also running a technology and social media brand called The Tech World.

SKILLS

Technical: Python, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative Artificial Intelligence, Retrieval Augmented Generation, Internet of Things, Sensor Integration, Edge Computing, Streamlit, FastAPI, React, Groq Application Programming Interface, ESP32 Firmware, CAN Bus Communication, MQTT Messaging

Other: Data Analysis, Cybersecurity Fundamentals, Model Deployment, Technical Writing, Content Strategy

Languages: Urdu (Full Professional), Sindhi (Native or Bilingual), Saraiki (Native or Bilingual), Hindi (Full Professional), English (Professional Working)

EXPERIENCE

Machine Learning Intern

July 2026 (One Month)

FlyRank Artificial Intelligence | Sukkur

- Followed a structured weekly curriculum to build a series of notebooks covering baseline scoring, model comparison across Logistic Regression, Decision Tree, and Random Forest, a validation and audit notebook, and an action playbook.
- Was publicly recognized by FlyRank on LinkedIn for honestly documenting methodology concerns, including data leakage and client overlap issues, found while auditing a research paper.

Data Analyst

June 2026 to July 2026

Qwetrum Technologies | Sukkur

Computer Vision and Internet of Things Intern

June 2026 to July 2026

Microvision | Sukkur

- Contributed to Track G, Team 2, converting physical vehicle controls built to a T85 layout into digital inputs for a computer simulation, using a dual controller architecture with Controller Area Network bus communication and MQTT for data transmission.
- Wrote firmware for ESP32 boards in Cirkuit Designer and prepared a full internship report covering the project.
- Designed computer vision algorithms and Internet of Things architectures for real time sensor data processing on edge devices, working with cross functional teams to keep performance within computational limits.

Natural Language Processing Intern

February 2026 to March 2026

Elevvo Pathways | Remote

- Selected for a fully sponsored, competitive internship on the Natural Language Processing track, working through a project based curriculum covering text processing, model development, and application deployment.

Backend Development Intern

January 2026 to February 2026

The NextEra Solution with Technology Company | Sukkur

Intern

Alkhidmat Foundation | Pakistan

- Produced orientation reports and research documents examining social challenges in Pakistan.

Mathematics Teacher

January 2018 to June 2025 (Seven Years Six Months)

Social Mobilizer

EPI | Thul, Sindh, Pakistan

July 2019 to December 2019

Founder

The Tech World | Pakistan

Ongoing

- Run a technology and social media brand sharing internship work, technical projects, and learning updates across platforms.

TOP 10 PROJECTS

- ResumeFit: a full web application using Streamlit and the Groq Application Programming Interface, offering resume and job description matching, keyword analysis, and a retrieval augmented generation feature based on term frequency inverse document frequency similarity.
- Voice Assistant: a Python based desktop assistant using Whisper for transcription, Groq for language model responses, and pyttsx3 for speech output, with a roadmap for intent detection and task execution.
- Job Portal: a job matching platform with a FastAPI backend, SQLite database, term frequency inverse document frequency resume matching, and a React frontend built on a custom design system.
- Predictive Maintenance Dashboard: an industrial predictive maintenance system built with XGBoost and LightGBM on the AI4I 2020 dataset, deployed as a Streamlit dashboard.
- School Management System: a role based platform for Al Habib Public School Thul built with Streamlit and SQLite, covering administrator, teacher, and student dashboards.
- Traffic Sign Recognition Application: a Streamlit application deployed to Streamlit Community Cloud for recognizing road traffic signs.
- Personal Portfolio Website: a terminal themed portfolio site featuring a binary canvas animation and typewriter effects.
- Gesture Meme Generator: an application using MediaPipe to generate memes based on hand gesture recognition.
- Professional Invoice Analyzer: a tool for extracting and analyzing data from invoices, deployed as a live Streamlit application.
- Customer Review Sentiment Analyzer: a natural language processing application for classifying customer review sentiment, deployed as a live Streamlit application.

ACHIEVEMENTS

- Top 10 Finalist, HEC Generative Artificial Intelligence Hackathon 2025.

EDUCATION

Bachelor of Science, Artificial Intelligence

Aror University of Art, Architecture, Design and Heritage | Sukkur

August 2023 to May 2027 (Expected)

- Grade Point Average of 3.43 out of 4.0.

Intermediate, Pre Medical Studies

Government Degree College Thul | Thul, Sindh, Pakistan

August 2019 to September 2021

Matriculation, General Science

Government AQS High School Thul | Thul, Sindh, Pakistan

August 2017 to September 2019

TOP CERTIFICATES

- Google Cybersecurity Professional Certificate
- Generative Artificial Intelligence Application Developer Certificate
- Google People Management Essentials
- Configuration Management and the Cloud
- Introduction to Artificial Intelligence
